As you can see from Scrabble's most effective words, a huge vocabulary isn't necessarily the secret to winning games. Being a master of posting how to win in Scrabble. Can't say a word? Chances are worthy that you can pluralize ong, add a suffix, or do something sneaky instead. Here are some other tips for winning Scrabble every time you play: Tip #1: Aim to get Bingo Is 50 Points; It's nothing to sneeze at! You get Scrabble bingo when you use all seven letters on the rack at once. Use our Scrabble word generator to practice figuring out seven letter words and eight-letter words that will allow you to get rid of everything at once. This is a great reason to hang on to empty tiles as well. Tip #2: Become a master at Hook In Scrabble, connecting is the practice of adding letters to a word already on board (usually an S) and then using a single letter to build a new word in the opposite direction. For example, you can add an S to the end of the hat to create hats, and then use the S to write a whole new word like shield. It's important to remember that once you choose the direction to drop the letters, you should keep in the same column or line. Tip #3: Remember the high-scoring two-letter words for parallel words these semi-irritating words like aa, qi, si, sui, ja, and axe are absolutely vital to your late-game performance when there's often less space, especially if you're planning on doing a parallel game. The parallels in Scrabble are kind of like the practice of connecting gone extremes: You can add a whole word parallel to another word, as long as all the letters line up to form the words themselves. For example, if the word zit is on the board you you you Add the word on horizontally underneath it, forming both za and it vertically. This practice can rake in a bunch of points later in the game! Tip #4: Have a backup of words in mind for difficult situations, if you have a kew, the desire may be hanged on to it forever until you get u, but it's important to remember that all irreproducible letters are counted against you in the end. The tile is worth 10 points, so it will take 10 points from your score! Sometimes, you need to figure out what to do with fast, and the same goes for Kew, which is also worth 10 points. Use our word scrambling search tool to figure out words in advance, so you're ready for difficult situations, such as when you have a #5 tip: Pay close attention to the board itself Remember if you're talking to fan friends that the board for Scrabble is very different! Everything is different, so you will need to develop a strategy. For example, it is very important to keep in mind that you can get a triple triple. According to the rules, if a word is formed that covers two premium word squares, the score doubles and then re-doubles (4 times the number of letters) or three times, and then re-tripled (9 times the number of letters). Combining this with powerful letters like Kew, Kew, or J can lead to a ton of points, especially if you happen to get bingo at the same time!
